MATTER FOR CONSIDERATION

Consideration of sealing options for Carnarvon Mullewa Road

BACKGROUND

The new roadwork’s south of the sand seal has 7-10km ready for sealing

At a recent visit by our consulting engineer, an inspection was carried out on the sealing works that was laid down in 2007.

The seal from the settlement to approx 17 km requires some remedial work to extend the life of the seal. It is very thin in places and is described as dead seal. The last three km require a more drastic approach as the pavement under the seal is cracking and will require some remedial work in the next six months to extend its life.

Upon further investigation of a sand seal, this type of seal requires a large amount of traffic volume and continuous cover of sand to “keep alive “ the seal. This type of seal is required to continue moving around to maintain an optimum life.

Council has previously endorsed to continue with a sand seal approach to the current project.

The current program is funded by RTR and RRG.

The shire has a couple of different seal types around the shire. The Jiggernoo strip was sealed in 2004 with a single coat seal, the bypass road at the bridge was sealed with a two coat 10/7 seal.

When spraying bitumen there is optimum times and core pavement temperatures that need to be met. An example of this is that the pavement should be around 21 degrees before applying any bitumen. In Murchison’s climate now, getting the pavement to 21 degrees would mean the contractors should not start until 10.30am and be finished by 3.00pm, or thereabouts. Getting contracting teams to spray when the right time is, is extremely challenging.

Based on the initial costs of a sand seal, this is always the cheapest option.

Sand seal cost \$2.87 per square meter

10mm seal cost \$ 4.00 per square meter

14mm seal cost \$ 4.83 per square meter

Sand seal also requires constant rework of sand and rolling due to our low volume of traffic.

The cost to seal the 18km we are preparing using different styles is;

Sand Seal 80000 square meters	\$ 229,600
10mm Aggregate Seal	\$ 320,000
14mm Aggregate seal	\$ 386,400

Both aggregate seal will require a second coat at some stage, in Jiggernoo Strip’s case it is likely to occur in 2010, an 8 year period between major works. The current sand seal requires action now, a period of 2 years.

With RTR and RRG funding we could utilise this funding for making the pavement, and utilise the R4R to seal.

We currently have a tender contract with Boral to complete these works. Should a change be made to the specification we would need to arrange this change.

COUNCIL DECISION/OFFICER RECOMMENDATION

OC100613 Sealing on Carnarvon Mullewa Road

Moved Cr MW Halleen, Seconded Cr P R Squires

1.Change specifications from a sand seal to a 10mm aggregate single coat seal for the next 18km seal project on Carnarvon Mullewa Road

2.Fund the difference in sealing with Royalties for Regions 2008-09 funding.

COUNCIL DECISION

OC100614 Sealing on Carnarvon Mullewa Road

Moved Cr MW Halleen, Seconded Cr P R Squires

This item lay on the table until the next meeting

Motion put and carried 5/0

CEO Comment

During discussions from the last meeting, council had requested that the CEO have the sealing man from Boral visit the site and give a comment on what he thought the spray rate should be.

Boral were booked to attend the site , but withdrew from this as we were not proceeding with the the sealing project. An explanation to Boral explaining that we were re-considering what type of seal we were going to use , but they still would not come for the inspection.

The new financial year has begun and as yet the 2010-11 budget has not been set. I have requested Greenfields to prepare a costing and whole of life costing on the different type of seals for consideration of Council before proceeding with calling of tenders for the supply of aggregates and seal for the 2010-11 year.

The estimates will be called on the following basis

1. Sand Seal
2. 14mm aggregate seal with a 10 year reseal second coat
3. 14/10 aggregate two coat seal
4. 10mm aggregate seal with a 5 year reseal second coat

Officer Recommendation

That Council;

1. Consider the costing's and whole of life cost for sealing the 20km project on the Carnarvon Mullewa Road at the August Ordinary meeting.

5.

 Attachments:

MATTER FOR CONSIDERATION
 Consideration of Interim Audit Management Letter

BACKGROUND

Council’s auditor has visited the Shire to audit process and accounts for the 2009-10 financial year . The following items in the management letter and responses from the CEO

14 July 2010

Mr Ron Adams
 Chief Executive Officer
 Shire of Murchison
 PO Box 61
 MURCHISON WA 6630

Dear Mr Adams

INTERIM AUDIT MANAGEMENT REPORT FOR THE YEAR ENDED 30 JUNE 2010

We have now completed our interim audit of the above financial year and are pleased to confirm that our sample audit testing did not reveal any significant weakness in the internal controls or accounting procedures. However we noted a few minor weaknesses.

SICK LEAVE APPLICATION FORMS

During our audit we noted that sick leave taken by G Pinnegar during the pay period ended 27 April 2010, did not appeared to have been authorised by way of a completed sick leave application form signed by his manager or supervisor.

We recommend that all employees wishing to claim sick leave complete sick leave application forms and those forms should be authorised by their supervisor before the pay is processed for that period. This will ensure that only leave that has been authorised is paid.

[CEO: The sick leave form has now been completed and filed in the employees file as required.](#)

SUPERANNUATION CALCULATION

During our interim testing we noted two instances (R Adams - pay period ending 19 January 2010 and G Pinnegar - pay period ending 27 April 2010) where the QuickBooks payroll function had failed to calculate the employees superannuation contribution correctly. In the case of R Adams the 9% superannuation was calculated once his road house deduction was deducted from his ordinary pay and G Pinnegar was not paid superannuation on the sick leave he had taken during that pay period.

We find issues with the calculation of superannuation at most shires we audit, that use the QuickBooks payroll function. We recommend you go back through the superannuation paid for the year for all employees and ensure it has been calculated and paid correctly. Both instances that we noted resulted in the underpayment of superannuation to employees. Any underpayments for the year should be contributed as superannuation for those employees. The method used by QuickBooks for the calculation of the superannuation should be checked for all employees, to ensure they are paid the correct amounts in the future.

CEO: As discussed with the Auditor to the use of Quickbooks for the payroll function does have some shortcomings. Leave is already calculated outside the Quickbooks function and handled manually. Superannuation has always been a problem area in Quickbooks as has been noted by the auditor at other shires as well. Shire staff who are operating the payroll system have been requested to manually check the super calculations when completing this function. A manual check of this area will be implemented in the due process for completing the super payments.

INCORRECT GST TREATMENT

During our audit we noted that the Shire made an error by paying \$31,834 to Landmark instead of Landmark Engineering, upon realisation of this error the amount was refunded back to the Shire of Murchison by Landmark. However the refund was recorded inclusive of GST in the general ledger and the expenditure was recorded exclusive of GST, leaving an unrecorded GST liability of \$2,894.

We recommend that this error be corrected and the next BAS adjusted accordingly. Care should be taken to ensure that the GST component of all transactions is treated correctly in the future.

CEO: The necessary adjustments have been recorded for inclusion on the next BAS.

RECONCILIATION OF FUEL SOLD

We noted that the Shire does not have a formal procedure in place for the reconciliation of fuel sold through the road house.

We recommend that the Shire needs to adopt a policy regarding the reconciliation of the fuel sold through the roadhouse, the more frequent this is done, the simpler and more reliable the reconciliation process will be.

CEO: Disussed with the auditor at last visit how the fuel system works and what tanks belong to the shire and how fuel is allocated between the tanks and then to the allocation of vehicles and or roadhouse sales. A draft procedure for these tanks is being drafted and will be available for inspection by the next Ordinary meeting

FINANCIAL ASSISTANCE GRANT (FAG)

We also noted that the Shire had not correctly allocated the FAG's grant income, it had allocated \$1,097,234 to the Grants Commission General account instead of \$1,267,126 as per the FAG's grant schedule and allocated \$664,975 to the Grants Commission Roads Account instead of allocating the sum of \$495,083 as per the FAG's grant schedule.

We recommend that this be adjusted accordingly.

CEO: Necessary adjustment made

EXPENSE ALLOCATIONS

We noted a large number of journal entries between expense accounts, to correct the allocation of expenditure.

We recommend that care be taken to ensure direct costs are allocated directly to the correct account. Allocation rates for Overheads, Wages and Plant Operating Costs also need to be reviewed to ensure they are being allocated correctly to keep any adjusting journal entries to a minimum.

CEO: When invoices arrive, they are coded and then input into Quickbooks. Journal entries are made to move allocations to their correct account if they have been posted to the incorrect account. During the period under review we have had some staff training in correctly costing invoices to jobs. As we have some staff turnover issues we never get this 100% correct, therefore the use of general journals is used.

CAPITALISATION OF FIXED ASSETS

We noted that on 25 May 2010 a satellite dish for the CEO's house costing \$2,073.06 had been expensed to the Building Maintenance account, this expenditure however appeared to be capital in nature.

We recommend that all capital items be capitalised as fixed assets and depreciated over their expected useful lives and not expensed directly to the profit and loss. The entry noted above should be adjusted accordingly.

CEO: this is a long standing argument between administrators and auditors, in this case the necessary adjustments have been made.

LONG OUTSTANDING RATES DEBTORS

At 30 June 2010 we noted \$56,515.13 of rates debtors outstanding for longer than ninety days. Approximately 60% of these outstanding rates rebate to non-mining/exploration properties with the remaining 40% relating to mining/exploration properties.

The Shire needs to adopt policy regarding the collection of rates and recap these outstanding amounts as soon as possible. As the recoverability of debtors has a direct impact on the Shire cash flows and longer they are outstanding the more difficult they may become to recoup. If the Shire efforts to recoup these amounts are not successful debt collectors should be appointed.

Additionally during our review of these debtors we noted one company owing \$6,819 of rates being Southstar Diamonds Ltd which has deregistered by the Australian Securities and Investments Commission ('ASIC') on 20 May 2009. And another company Korad Resources Ltd owing \$1,061 which ASIC had no record of. The recoverability of these amounts needs to be investigated as should these amounts not be recoverable they will need to be written off.

CEO: A reminder notice with letter from CEO has been sent to outstanding rates debtors for prompt payment. If rates not settled within 14 days will send to debt collector for due process. Recommend that during the policy review that inclusion of a rates collection policy as requested by auditor be adopted.

MEETING MINUTES

At the time of our interim audit visit on 8 June 2010 we noted that the meeting minutes for the October, November and December meetings had not been signed as a true and correct record of those meetings.

We recommend that when the Council confirms the prior meetings minutes as a true and correct record of that meeting that the President sign those minutes to confirm this has taken place.

CEO: Minutes are up to date

We would like to take this opportunity to thank you and your staff for the assistance provided to us during the course of the audit.

Please do not hesitate to call should you like to discuss any aspect of the audit.

Yours Sincerely
ANDERSON MUNRO & WYLLIE

MATTER FOR CONSIDERATION

Formation of a Regional Collaborative Group with Shire of Upper Gascoyne.

BACKGROUND

Council and the CEO attended the Shire of Upper Gascoyne on 28 May to discuss the possibility of forming a Regional Collaborative Group as require under the State Government Structural Reform Process.

I attended a meeting with DLG and Paul Rawlings to further pursue this group. The meeting was designed to discuss the contracts and formalise the group.

The requirement of this local government is to elect a representative to the group and a deputy representative.

MATTER FOR CONSIDERATION

Report on stove incident at roadhouse 23 June 2010

BACKGROUND

At approx 6.50pm Ms Hunter opened door on oven. Ms Hunter was flashed by oven flame and or heat. Ms Hunter sent her son to CEO house. Mr Hunter explained to me that the stove at the roadhouse had blown up and that he had turned the gas off at the bottles. He said his mum has some burns. I asked Leanda to go down and check on Ms Hunter as she had some burns and to report back to me. Leanda went down to roadhouse to attend to Ms Hunter. Leanda made a report to RFDS who prescribed the necessary treatment. Leanda encouraged Ms Hunter to attend a hospital , but she refused to do so.

I rang Sun City Plumbing and left a message to contact me as the stove has blown up. At 8.30 pm Ashley Sojan rang me and I explained that the gas stove had blown up and that all gas has been turned off to the building.

Ashley arranged a gas fitter to be on site at 9.30am the next day to inspect the problem.

Ryan the gas fitter inspected the oven for gas leaks. Ryan came to my office at made the following comments;

The gas safety switch is faulty and is causing gas to leak continuously.
 If we just replaced the switch then that may or may not fix the problem.

I had explained to Ryan that we had taken the stove from the old building and it was cleaned, checked and installed by Sun City Plumbing. The stove had been tested when installed and had been working for the last six weeks.

Several possible answers to why the stove would do this included but not limited to;

The stove is old

The cleaning products that are sometimes used do cause failure in stoves

Moving the stove may have been too much for it

Ryan explained that he would bet his “gas ticket” on that the stove needs to be condemned.

I agreed and ordered a new stove to be installed as soon as it arrived.

On 25 June I spoke with Brian Eckardt from LGIS (Local Government Insurance Service) about the injuries to Ms Hunter and a what was our possible claim on the old stove.

CEO's activity report

July 7-8

Auditor visit for the 2009-10 financial year

July 1-16

Opening activities

Upcoming meetings

- Main Roads-Crossland-Shires Murchison-Mt Magnet- drainage on Cue-Beringarra Road
- Local Government Convention

Staff

- Neville Hobbs resigned to take position with Shire of Victoria Plains-close to his house in Bindi Bindi
- Grace French has resigned to take a position as Deputy CEO at Shire of Wongan Ballidu
- Danny & Vicky Hewton have commenced duties as plant operator

WALGA CONVENTION

- Thursday 5 to Sat 7 August
- Reminder- Booked in for Wednesday 4 August , checkout Sunday 8 August
- Booked into the Parmelia Hilton , Mill Street, Perth

Updates on previous actions

Emergency Management Plan

- Agenda item for CSIRO next week, to be included in our plan
- Met with Jim McNamara re Pia Wadjarra Fire Plan
- Expect to have draft for presentation at September meeting

Power Requirements for Settlement

- Kevin Crowe has investigated
- Put in place recording method over next 12 months
- To be implemented on 1 August 2010

Heritage Precinct

- Community Consultation sent out and is due back on 25 July 2010
